Experience

Zappos Summer Intern

June 2020 - Sept 2020

Worked with AI team to develop web scrapping software to find reviews of products and then use sentiment analysis to find which products were more positively reviewed so they could be promoted on the website.

Projects

Symbiolic

North American Semi-finalist for Microsoft's Imagine Cup

Designed software that uses variational autoencoders to evaluate possible molecule candidates for drug applications to reduce discovery time.

TakeAways

Chrome Extension

Designed software that web scrapes for info on a specific topic and uses natural language processing to create a summary of important information on the topic.

Education

Deep Learning Specialization Course

Coursera 2019

Web Development Course

Udacity

Data Structures and Algorithms

Udemy

Awards

UOIT Sumobot Robitcs Tournament

2 time winner, 2018, 2019
